Imam Mobin International Research Center

Scientific ability of the research center

Imam Mobin International Research Center, with a background of two decades of activity and with a license from the Ministry of Science, Research and Technology (No. 2/91403), is engaged in scientific and research activities in the form of several scientific groups in the subjects of Islamic and Shiite sciences.

With the capacity of enjoying the authors and translators of the Islamic sciences in fourteen languages and interacting with them, this center is ready to conclude contracts with cultural, educational and scientific centers inside and outside the country for the implementation of the following research projects:

- Compiling textbooks on Islamic science subjects in a general sense, in various stages and in fourteen languages
- Translating Islamic and Shiite texts as well as textbooks in various languages
- Implementing fundamental, applied, and development research projects in the form of authoring and editing in ten languages
- Correcting, researching and reviving the heritage and manuscripts, and printing of the old religious works of Shia thinkers;

The target languages are: Persian, Arabic, English, French, German, Spanish, Portuguese, Turkish, Azeri, Urdu, Norwegian, Chinese, Russian, and Indonesian.
